Dear Mr. Terreni:

I am filing the following written comments to you in accordance with Docket No. 2005-385-E – Order No. 2006-680 on the consideration of implementing the requirements of Section 1251 (Net Metering and Additional Standards) of the Energy policy Act of 2005.

I support the federal government's plan for net metering for the following reasons:

1. Our current reliance on fossil fuels (including coal, petroleum, and natural gas) is unsustainable in the long run.
2. Net metering has already been successfully implemented in 40 states and the District of Columbia.
3. Net metering provides a significant financial incentive to change the way we generate electricity and to lower fossil fuel emissions.

For the above-mentioned reasons I strongly encourage the PSC to set net metering as the standard for the public utilities that it regulates.

Sincerely,

A handwritten signature in dark ink, appearing to read "Lora L. Kline". The signature is fluid and cursive, with the first name "Lora" being more prominent.

Abbeville, SC 29620

Dear Commissioners,

In reference to S.C. Public Service Commission Docket # 2005-385e Order #2006-680.

I would like to respectfully request that you allow residential customers to "net meter" and without any restrictions. I think it is apparent why the utilities would like to prevent net metering. Allowing the use of net metering would help all South Carolinians , by reducing demand on the utility, making us more independent, and reducing pollution. Also if you approve net metering I ask you not allow the utilities to create cumbersome requirements to effectively prevent it. The technology is available, and it is compliant with the National Electrical Code. Thank You

A handwritten signature in black ink, appearing to read "H. L. Poplin".

Henry L. Poplin
